

## 4 Channel Relay Shield For Arduino Nano

4 Channel Relay Arduino Nano shield contains onboard 4 relays, TSOP1838 Infra-Red Sensor, NRF24L01 RF transceiver module, 4 tactile switches. The circuit described here can be used for many applications like, infra-red remote controller, RF remote controller, 4 channel toggle switch.

### Features

- Supply 12V DC
- 4 Relay with Normally Open/ Normally Closed Option
- Relay can handle 7Amps DC or AC
- On Board TSOP1838 Infra-Red Receiver
- On Board 4 Tactile Switches
- On Board NRF24L01 RF Module
